WORSHIP SET LIST

ROADMAP

This roadmap can serve as a guide for worship leaders in their song selection for church services.

It balances the types of songs that serves different purposes in a congregational setting, starting with the encouraging and engaging praise songs, to the more adoration types of songs. It also helps worship leaders from falling into the comfortable routine of choosing only the styles of songs they like!

Originally shared by Jad Gillies (Hillsong) at an online training event organised by APCCS.
